

ASSET MANAGEMENT APPRECIATION

1 day

Monday 27 June 2016

433 Boundary Street, Spring Hill, QLD

AUD 690.00

Lloyd's
Register

UNDERSTANDING ISO 55001

The International Standards Organisation published ISO 55001 in 2014. Applicable to any size of organisation which depends upon its asset base for the delivery of its products and services, it sets out the means of ensuring the organisations goals are supported by effective asset management.

Developed by an international team of asset management professionals from over 40 countries and with members of the Lloyd's Register team contributing, the standard is the new non-proprietary benchmark against which asset management systems can be developed and measured.

This course is delivered in conjunction with Lloyd's Register who have delivered assessment and certification to over 70 international organisations against PAS-55/ISO 55000. The course tutor is an experienced Asset Management practitioner and assessor with direct Australian practical experience.

WHO SHOULD ATTEND?

Suitable for Managers and Directors, this intensive one day course provides a good understanding of the key aspects of asset management and the important components required to put an asset management system in place that meets the ISO 55001 certification requirements.

COURSE CONTENT

The course covers all key areas of asset management explaining what the requirements of the standard mean in practice with examples of how they may be applied.

Emphasis is placed on the following key issues

- aims and objectives of the strategic asset management plan
- alignment of asset objectives with corporate objectives
- the management of risk to optimise asset management decisions

Understanding how the asset management system is performing and how to drive necessary change whilst continuing to operate and gain value from the asset base are central themes.

The course is tailored to ensure all key points required for ultimate certification of the system are covered and understood.

APPLY ISO 55001 TO YOUR ASSET MANAGEMENT

EFFECTIVE ASSET MANAGEMENT ALLOWS YOU TO BUILD ON THE EXCELLENCE WITHIN YOUR ORGANISATION, TO CHALLENGE PRACTICES THAT NO LONGER ADD VALUE, AND TO ENHANCE THE REALISATION OF VALUE FROM THE ASSET BASE OF THE COMPANY.

There are many myths and misunderstandings about asset management. Organisations wrestle with legacy systems, sometimes living with a system that isn't quite as aligned with the business needs as it once was. There are often areas of excellence - good practice exists in almost every organisation, yet there are also areas where enhancement is needed, or opportunities are being missed.

WHERE TO FROM HERE

Competency Training's capability to progress our graduates, from new industry entrants to mature leaders, is based on the real world expertise of specialist educators who deliver education and compliance on site, or in the classroom.

We have a unique holistic approach to training and compliance, delivered by a highly experienced multi-disciplinary team.

For further information on your education and training options, or for possible corporate or volume discount offers, please contact us.
